ADVANCED TRACK PPT FORMAT

SLIDE 1: TITLE SLIDE

PROBLEM STATEMENT:

TEAM NAME:

IDEA TITLE:

SLIDE 2 : PROBLEM FRAMING

The core trade-off in your own words, the objective you’re optimizing, and the failure modes you’re avoiding.

SLIDE 3 : MODEL AND ALGORITHM

The quantitative core: forecasting, optimization, matching, or scoring. Explain why you chose it over alternatives and the key assumptions.

SLIDE 4 : HANDLING UNCERTAINTY AND EDGE CASES

Spikes, bad forecasts, adversarial behavior, and degraded inputs. Explain what your system does when it’s wrong.

SLIDE 5 : LIVE DEMO / SIMULATION RUN

The system running through a scenario, with the key decisions visible as they happen.

SLIDE 6 : RESULTS

Your metrics against a naive baseline, ideally with a chart showing the improvement and the trade-off curve.

SLIDE 7 : TRADE-OFFS

What you chose for speed, scale, or simplicity, what you sacrificed, and how it would hold up under 10x load.

SLIDE 8 : LIMITS AND NEXT STEPS

Known weaknesses, what you’d do with another week, and what a production version would need.
